Review on AppExchange

Awesome Tool For Easier GDPR Compliance

A great tool to handle RightToBeForgotten, DataPortability, ConsentManagement & DataRetention!

Super easy implementation and it allows for quick customization should it be necessary. Out of the box it allows for individuals to manage their own consent through a self service portal or through an existing community set-up, awesome feature! Special shout-out to Radha, Aniket and the team for providing awesome support and set-up assistance.
